## RECORD OF WORKS CARRIED OUT BY TERRY GRIFFITHS CONTRACTS

### Notes.

Street cleaning.

At areas where we cleaned footways and in the built up areas generally we will arrange for our road sweeper to clear the leaves and debris from the road. This will help to keep the drainage systems clear during heavy rainfall.

At Belpha Farm entrance the culvert trash grill has been overloaded during the heavy storms of the last few days. The grill has collected large amounts of debris washed down from further up the watercourse. It looks like we will have to bring the digger to clear it.
